

Suppliers are more than just business partners!

AxiCorp has been very successful in the PI business for more than six years. As one of the leading PI companies in Germany, AxiCorp relates its success to the strong commitment and support of our international business partners and suppliers.

Today we benefit from a strong and reliable network all over Europe. And since AxiCorp has a clear focus on growth, we are constantly looking for new partners.

Suppliers are more than just business partners to us.

We care a lot about service – working together with AxiCorp should be as convenient as possible for you! Our young and motivated team wants to make the difference! This is why we have established a structure of fully responsible area managers within the purchasing department. For our partners, the area managers offer a wide range of services:

- **One competent contact person for all your inquiries**
- **Personal, long-term oriented relationships**
- **Market information services and support for your marketing and sales activities in Germany**
- **Immediate response**

Our target is to deliver you the highest possible quality in service and transaction processes and the highest possible transparency in our strategy.

**Our principle:
full attention on international partners –
always!**

Your area manager is in charge of the day-to-day business with you. No matter whether this be price inquiries, new products, new business ideas or information on the German market – one competent contact person will be always at your disposal.

Strong and reliable relationships between AxiCorp and its business partners are the basis for common success and growth. As in a personal relationship, progress is a result of clarity. So we try to analyse the situation of today in order to project the potential of tomorrow –
and discuss it with you!
